

## End-to-End Integrated Software Framework for the Derivatives Trading Lifecycle

SinaraTLC enables financial institutions and trading partners to accelerate business growth and increase business opportunities with customised software solutions.

Legacy systems have long been a problem for businesses trying to modernise their service offerings. Inaccurate data, obsolete platforms, and slow trading cycles can lead to a decline of growth and a decrease of opportunities and ROI.

For the past 30+ years, Sinara has been at the forefront of advanced software solutions for the financial markets. Financial institutions, trading venues and exchanges have partnered with Sinara to create tailored systems that allow their businesses to maximise profit margins and scale business models.

### Transform your trading lifecycle

Transform front, middle and back-office procedures with SinaraTLC's real-time capabilities. Manage risk across the lifecycle with centralised views of all pre and post-trade positions and accounts, adhere to governing policies with collateral management and regulatory reporting, and handle trading events and calculations with streaming data sets.

### Streamline targets with automation

Manual and scattered processes create ineffective time and asset management, leading to the loss of investment and profit. SinaraTLC incorporates intelligent process automation that improves trading workflow, provides an overall view of business insights, and enhances customer service with simple-to-use communication and execution tools across all trading branches.

**Workflow Automation**

**Real-time From End-to-End**

**Deployment-Ready**

**Mission Critical Support**

**Maximise potential with speed to market**

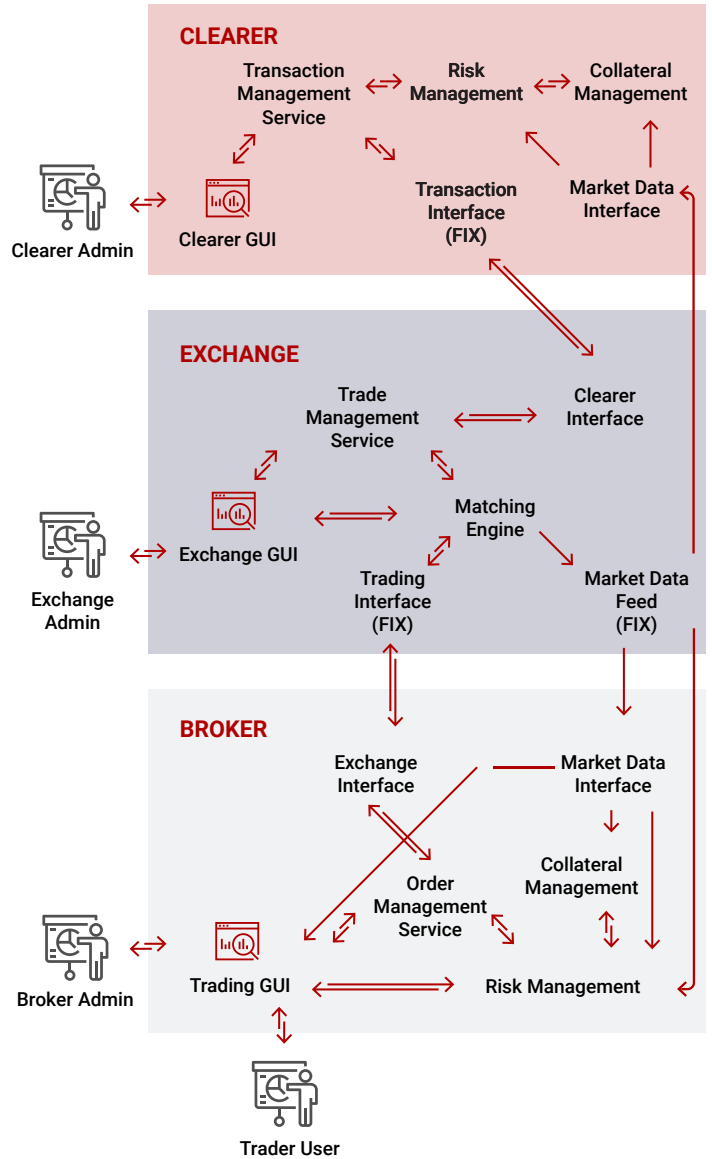

Utilising SinaraTLC, time to market is reduced with a rapid-to-deploy and configurable framework. React quickly to market changes with real-time accurate data, and cater to customer demands with the ability to deliver new products and services. Eliminate time-consuming processes that consume precious resources, and maximise assets to their fullest potential.

**Competitive advantage with scalability**

The financial space has become a fast-moving industry as the challenge for innovative services test a firm’s competencies. The need to scale at a rapid rate is a fundamental necessity for market leaders who seek a competitive advantage. SinaraTLC provides a flexible foundation to scale up at pace by integrating market data, existing information sources and systems, and meet the pressures of supply and demand.

**Reduce spend, Increase profit**

With a modular, cloud-ready platform, easier and faster market access for your customers is readily available. The SinaraTLC suite provides a set of customised IT solutions that inspires your teams to actively seek new opportunities throughout the trading lifecycle. Remove the obstacles of a costly, rigid structure that hinders business goals, and empower your company with a fast and flexible system that improves your bottom line.
